Foreword

This informative booklet should be on every pediatrician's bookshelf. It is a compilation of facts that physicians who take care of children with special health care needs should have. As children with special health care needs grow into young adults we need to help them make the transition to this next stage. Most of us are not completely knowledgeable about the intricacies of this transition. This booklet lays it out in clear language that details what the parents need, the patients need, and the ongoing physician needs. Not only are there medical, social, educational, recreational, and employment issues, but there are legal concerns to be considered. This booklet, in one place, details what the issues are and the state, federal and other resources available to help address each of them.

Especially useful are the guides for the patient and guides for the families that can be copied and handed out in the course of care. These checklists remind everyone of those items requiring attention. It also has suggestions of how they can be accomplished and many of the resources for getting them done listed right on the same page.

To my colleagues who receive this booklet, take a few minutes to familiarize yourself with its contents and read several of the sections before you put it on your bookshelf. Once you do that, you will take it off that shelf often, as it will become a valuable tool in your care of our very special patients. This booklet is specific to Massachusetts but should be replicated state-by-state because of its well-organized content.

*Eugenia Marcus, MD, FAAP
President, Massachusetts Chapter
American Academy of Pediatrics*

How This Booklet Can Help You

As a Primary Care Provider, you support families in a variety of ways throughout the lives of their children. You are in a unique position to help and support adolescents as they journey into adulthood, particularly children with special health care needs and disabilities. Even as the number of young adults with special health care needs is increasing, many families still experience this journey into adulthood as lonely and challenging. To help you assist families, this booklet includes resources and strategies to guide your interventions with families and to focus their attention on four key facets of adulthood: health, education, employment and recreation. This booklet may help to make these discussions a routine part of your visits with adolescents with special health care needs and disabilities. Your role in incorporating and passing on information to adolescents in your practice is critical and we hope this booklet will give you the tools you need to do so.

How To Use This Booklet

This booklet is written for providers (pediatricians and nurses) but contains handouts that should be copied and given to families and adolescents.

The booklet addresses four aspects of adulthood:

1 HEALTH

2 EDUCATION

3 EMPLOYMENT

4 RECREATION

Each of the four topic areas contain the following elements:

Background Information and Issues:

This introductory section is written for the provider and highlights the important facts, concerns and challenges that define the need for provider interventions.

Family Fact Sheet:

Each of these sheets should be copied and given to parents/guardians. The sheets provide important factual information, reminders, strategies and resources for families to consider as they help their adolescents become adults.

“Taking Charge” Sheet:

These four teen-specific sheets can be copied and given to adolescents. The sheets promote self-care and advocacy, provide tips and identify resources for additional information.

In addition, this booklet includes:

Provider Checklist and Timeline:

The provider checklist can be used as a tool to remind you to raise specific issues at different visits. We recommend copying the checklist and putting one on the front of each patient's chart for easy reference.

Community Resources:

Providers can help families by directing them to resources.

Additional Tools and Information:

The booklet contains other tools that will remind providers to initiate discussions on specific topics with families and/or provide more detailed information where that might be needed. This section also includes suggested readings for providers and families.

Summary of Important Laws:

Laws that protect people with disabilities in the areas of education, employment and recreation are briefly described.

Glossary of Terms:

Definitions of words used in the booklet.

Introduction

In recent decades the prognosis for children and youth with special health care needs and disabilities has changed significantly. Now more than 90% of children with disabilities reach adulthood. In light of this, we face the new challenge of providing appropriate services and resources to adolescents and young adults who deal with health issues.

Underlying these changes in outcomes are changes in practice. New technologies and treatments have dramatically enhanced medical capacity to care for children with special health care needs and disabilities. Both medical advances and the trend towards managed care have also shifted care out of the hospital and into the community. This places new responsibility on primary care pediatricians to be proactive in providing support and information to adolescent clients with special health care needs and disabilities. Chronic illness and disability impacts every aspect of an adolescent's life. Studies show that adolescents and adults with disabilities are at increased risk for substance abuse, sexual abuse, unemployment and limited social experiences. These risks can be reduced when adolescents are given support to live active, meaningful lives in their communities. Health care providers play a critical role in helping the adolescent successfully prepare for adulthood.

What is Transition?

Transition is the term used to describe a dynamic process experienced by adolescents with special health care needs and disabilities as they become adults. Transition entails not only transfer of care to an adult provider but all facets of adult life, including health care, education, employment and recreation. The goal of transition is for adolescents to move towards autonomy.

The Role of the Pediatrician

The 1990 passage of The Americans with Disabilities Act (ADA) affirmed the right of people with disabilities to participate in education, employment and recreation. Depending on a provider's own experiences and biases he/she will have his or her own expectations about the opportunities available to adolescents with special health care needs and disabilities. Because the reality is that significant progress has been made in broadening opportunities for those with special health care needs and disabilities, providers can benefit from being updated on what is available. Additionally providers may be unfamiliar with community services and resources that can help in the transition process. Becoming informed about services and supports is critical. In order for the young adult to attain his/her potential, he/she needs a provider who can foster opportunities in the areas of health, education, recreation and employment.

Moving the adolescent toward independence may be difficult for the family and the provider, yet it is an essential step in the process of transition. The primary care provider is instrumental in facilitating the health care transition process. Assisting in the coordination of comprehensive care and empowering the adolescent to become as independent as possible is the key to a smooth transition. It is appropriate for the primary care provider to be active in the transition process for the following reasons.

The primary care provider:

- Has a trusting relationship with the adolescent and his/her family;
- Is often a powerful influence on the adolescent and family;
- Can stimulate discussion about the adolescent's future;
- Understands the nature and implications of the adolescent's chronic illness or disability;
- Can help the family determine the appropriate time for transition discussions based on the adolescent's development and needs;
- Practices family-centered care.

Issues for Health Care Providers

It is important to acknowledge that families and providers face many different issues when moving through the transition process. It is helpful to keep the following concepts in mind to ensure a positive transition experience.

- It is essential for the adolescent to be part of any team that makes decisions about his/her future.
- Comprehensive transition planning should aim at continuous care of the young adult.
- Providers and families should use the model of “normalized” adult transition as they chart a path for the adolescent with special health care needs and disabilities. It is safe to assume that typical life experiences (in employment, recreation and education) have the same importance and value for all adolescents.
- Transition, in all its forms, needs to be a shared responsibility of the pediatrician, the family and the adolescent.
- The pediatrician and the adult care provider need to develop a collaborative relationship.
- Adolescents and families need to be comfortable making a transition to a new provider.

Keeping these concepts firmly in mind can help the provider fulfill his/her role as guide, support and facilitator in the transition process.

Principles of Transition Services

- Transition is a process, not an event.
- The transition process should begin at the day of diagnosis.
- The adolescent and family should be involved in the decision process.
- Providers and parents should prepare to facilitate movement.
- Coordination of services and providers is essential.

(White, 1997)

Provider Transition Checklist and Timeline

Checklist Instructions: The timeline provided here can be modified as developmentally appropriate for your adolescent patient. Use your clinical judgment as to which items apply to your patient. Refer to content-specific sections of this booklet for further information about these points.

Name: _____

HEALTH CARE	Ages 11-13	Ages 14-16	Ages 17-19	Ages 20-22
Meet privately with the adolescent for part of the office visit	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Encourage the adolescent to assume increasing responsibility for his/her health care management				
• Assure the adolescent understands his/her health condition and medications	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
• Send copies of reports, letters and tests to the adolescent and family	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Provide anticipatory guidance				
• Nutrition and fitness	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
• Sexuality and relationships	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
• Substance abuse and smoking	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Assess the adolescent's and the family's readiness for transfer to an adult health care provider				
• Initiate discussion about transfer to an adult health care provider		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
• Identify possible adult care providers			<input type="checkbox"/>	<input type="checkbox"/>
• Encourage patient to meet and interview adult providers			<input type="checkbox"/>	<input type="checkbox"/>
• Initiate communication with the adult provider that the family has selected			<input type="checkbox"/>	<input type="checkbox"/>
Implement the transfer to an adult primary care provider				
• Transfer medical records			<input type="checkbox"/>	<input type="checkbox"/>
• Discuss nuances of care with the adult provider			<input type="checkbox"/>	<input type="checkbox"/>
• Follow-up after the transfer			<input type="checkbox"/>	<input type="checkbox"/>
Assess the adolescent's ability to make independent decisions regarding health care, finances and other adult concerns for determining whether there is a need for guardianship/conservatorship				
• Initiate referral for assessment of competence if needed			<input type="checkbox"/>	<input type="checkbox"/>
• Provide medical documentation			<input type="checkbox"/>	<input type="checkbox"/>
• Follow-up on the process with the family			<input type="checkbox"/>	<input type="checkbox"/>

Provider Transition Checklist and Timeline

EDUCATION	Ages 11-13	Ages 14-16	Ages 17-19	Ages 20-22
Remind the adolescent of his/her legal right to be present and participate in the educational planning meetings required by special education law		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Ask the adolescent and family how you can participate in the Individualized Education Program planning process.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Make sure the adolescent and family know that federal law requires that transition planning begin at age 14, focusing on the student's course of study as it relates to the adolescent's long-term plans		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Make sure the adolescent and family know that starting at age 16 needed transition services must be included in the student's IEP. They should focus on the goals, objectives, activities, and services related to transition.		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Advise families that at age 18 a student has the right to make all decisions in relation to special education programs unless the family has petitioned the court for guardianship or the student has chosen to share or delegate decision making to a parent.			<input type="checkbox"/>	<input type="checkbox"/>
Remind the adolescent and family that if s/he is not eligible for special education services, s/he may still be eligible for 504 accommodations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Remind the adolescent and family that the entitlement to special education services ends when the adolescent graduates, withdraws from high school or reaches age 22			<input type="checkbox"/>	<input type="checkbox"/>
Assess the adolescent's ability to make independent decisions regarding education starting at age 18. If independent decision-making does not seem appropriate, discuss the option of joint decision-making by the adolescent and the family.			<input type="checkbox"/>	
Discuss with the adolescent plans for further education beyond high school		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Provider Transition Checklist and Timeline

Name: _____

EMPLOYMENT	Ages 11-13	Ages 14-16	Ages 17-19	Ages 20-22
Initiate discussion of different routes to employment such as higher education, technical training or supported employment		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Encourage the adolescent and family to explore community vocational opportunities and to become familiar with vocational services, even if further education is planned.		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Advise families that at age 18 a student has the right to make all decisions in relation to special education programs, including employment planning, unless the family has chosen otherwise or has petitioned the court for guardianship.			<input type="checkbox"/>	<input type="checkbox"/>
Discuss with the adolescent and family the importance of early work experiences and job-related skills such as resume preparation and interviewing		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Remind the adolescent and family that at age 14 individualized transition planning should focus on developing a vision for employment and education	<input type="checkbox"/>	<input type="checkbox"/>		
Encourage the adolescent and family to contact local and state agencies involved in employment services.		<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Have the adolescent and family contact the Social Security Administration to learn about and plan for financial aspects of employment, such as work incentives			<input type="checkbox"/>	<input type="checkbox"/>
RECREATION	Ages 11-13	Ages 14-16	Ages 17-19	Ages 20-22
Discuss in-home and community recreation options	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Help families develop strategies to foster friendships and avoid social isolation	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Share health care information that may affect the adolescent's ability to participate in recreational activities	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Produced by the Institute for Community Inclusion at Children's Hospital, Boston, as part of the Massachusetts Initiative for Youth with Disabilities, a project of the Massachusetts Department of Public Health. Supported in part by project #HO1MC00006 from the Maternal and Child Health Bureau (Title V, Social Security Act), Health Resources and Services Administration, Department of Health and Human Services.

Young adults with special health care needs and disabilities should transition to an adult provider. What is my role as primary care provider?

- Age 14 is an appropriate time to begin the process of health care transition planning and implementation.
- The provider can reduce family stress and improve outcomes by providing guidance and support around transition planning.

TRANSITION HEALTH CARE

Background

There are two main components of health care transition for the adolescent with special health care needs and disabilities:

**Increased self-management of health care on the part of the adolescent,
and
Transfer of care from pediatrician to adult care provider.**

Health care for the adolescent with special health care needs and disabilities often involves an intricate web of providers. The work of coordinating this network falls largely to families, but the primary care provider has a key role in assisting and supporting families. As an adolescent becomes older he/she needs to assume greater responsibility for his/her health care management as individually appropriate. The primary care provider must help the adolescent, whose decision-making and problem-solving skills are still evolving, to take on this new role. At the same time, the primary care provider must encourage and work with the family to identify an appropriate adult health care team. Providers must invest time in transfer of information and coordination of care among multiple specialists in the process of transitioning an adolescent to an adult provider.

Understanding the Issues

- Adolescents may experience fear, anxiety and a sense of loss when shifting to an adult provider. Concerns may center around the need to introduce someone new to a complex health history and a unique set of health care needs and challenges. Development of a new personal relationship may create anxiety.
- The family struggles to trust that their young adult can manage his/her own health care, with the parent in a less dominant role.
- If the adolescent has a special health care need or disability significant enough to interfere with his/her ability to make important financial and medical decisions, the provider will need to initiate referral for assessment of competence and assist with documenting the need for guardianship or conservatorship. This must be done before the adolescent reaches the age of 18.
- Families may also feel a sense of loss. Fear of the unknown when transitioning to a new provider is common.
- Providers with multidimensional relationships with the adolescent and family may themselves feel sad at the prospect of transition.

Next Steps

1. **Review the Transition Checklist and Timeline (pp. 17-19)**
2. We have included information sheets to share with families and the adolescents you treat. We recommend that you photocopy the following materials and distribute them to the suggested audience.

Handout	Family	Adolescent
Health Care Family Sheet (pp. 23-24)	✓	
Taking Charge of your Health Care (pp. 25-26)		✓
Communicating with Doctors and Other Health Care Providers (p. 57)	✓	✓
Health Care Skills Checklist (pp. 58-59)	✓	✓
Massachusetts State Resources (pp. 63-67)	✓	
References and Suggested Readings (pp. 71-73)	✓

www.eparent.com

Family Sheet

Parents of children with special health care needs and disabilities need to plan, connect, advocate and find information on behalf of their child. Planning ahead is very important and makes a difference.

This fact sheet on health care transition explains important issues and lists practical steps that should be addressed in adolescence. The fact sheet discusses two aspects of health care transition. The first aspect is the need for increased responsibility by the adolescent for his/her own health care. The second is the need for families to plan for transfer of care from the pediatric provider to the adult provider.

Read the sheet and refer to it every now and then as you travel through the transition process with your adolescent.

- Begin by age 14 but plan over a period of time. Make a plan that is specific to your adolescent and his/her special health care needs.
- If your adolescent has a special health care need or disability significant enough to interfere with his/her ability to make financial and medical decisions, you will need to file a petition to the court six months before your adolescent turns 18 to maintain guardianship or to initiate conservatorship.
- Ask the provider how and when age-appropriate information will be shared with your adolescent about: his/her disability or chronic illness, sexuality, preparing for parenthood, genetic counseling, vocational awareness, work opportunities and leisure time.
- Suggest to the provider that he/she meet privately with your adolescent to discuss topics such as physical, emotional and sexual development, relationships and friendships, sexuality, alcohol, drug and tobacco use, and family issues.
- Ask the provider who on his/her staff can assist you in care coordination.
- Ask the primary care provider or nurse for help in identifying others such as school nurses and personal care attendants who can help manage your adolescent's care.
- Talk to your adolescent about his/her condition and/or disability in a way that he/she can understand. If your adolescent has developmental disabilities, work with his/her primary care provider to choose the key points and figure out how to make them clear.
- Help your adolescent understand the importance of the medication he/she takes.

- Encourage your adolescent to make his/her own health care appointments.
- Encourage your adolescent to prepare for doctor visits by writing down questions in advance. He/she should also keep his/her own health notes and records.
- Begin teaching your adolescent about his/her insurance coverage.
- Discuss with the primary care provider when you should consider transferring your adolescent's care to an adult provider.
- If you decide that you should work towards a transfer of care, work with your adolescent's primary care provider to find appropriate adult providers.
- Talk to other families and young adults with similar special health care needs and disabilities to help you identify an appropriate adult health care provider for your adolescent.
- Schedule an interview visit with possible adult providers before transferring your adolescent's care. If possible, encourage your adolescent to call and schedule the visit.
- Visit with each provider to determine if he/she is a good match for your adolescent.
- Ask your primary provider to transfer your adolescent's medical records prior to transfer of health care to the adult provider.

Transition Health Care

Taking Charge of Your Health Care:

A handout for adolescents and young adults
with special health care needs and disabilities

Be your own health care advocate

- Learn about your condition or disability.
- Know the warning signs that mean you need emergency help.
- Know who to call in case of an emergency. Carry that information with you.
- Learn how to make your own appointments.
- Write down any questions you have before you go the doctor's office.
- Meet privately with your doctor/nurses and others.
- Speak up and ask your doctor or nurse questions. If you don't understand an answer, ask again.
- Talk to your doctor about difficult topics such as relationships, drugs, and birth control.
- Tell your doctor if you are feeling down. Your doctor can suggest people to talk to.
- Ask your doctor to explain all tests and their results.
- Ask for copies of medical tests or reports.
- Carry your insurance card and other health care information that you think is important.

Take charge of your health care information

- Be sure to understand the medications that you are taking. What are their names and when do you take them?
- Know how to call your pharmacy and how to fill your prescriptions.
- Make sure you know your insurance and how to get a referral.
- Keep a list of addresses and telephone numbers of all your doctors and nurses.
- Keep a notebook of your doctor reports, medications, operations and results of medical tests.
- Ask your doctor for a short written summary of your health condition.
- Know how to order and take care of any special equipment you use.

Plan for transfer to an adult doctor

- Talk to your doctor about how and when you should start seeing an adult doctor.
- Discuss with your doctor resources that might be helpful to you.
- Meet and talk with the new adult care doctor before you switch.

Children with Disabilities

This website offers information for families, service providers, and other interested individuals on topics such as advocacy, education, housing, health and recreation. There is a "Youth to Youth" page.

www.childrenwithdisabilities.ncjrs.org

Keep yourself healthy, exercise, and eat a good diet...

Produced by the Institute for Community Inclusion at Children's Hospital, Boston, as part of the Massachusetts Initiative for Youth with Disabilities, a project of the Massachusetts Department of Public Health. Supported in part by project #HO1MC00006 from the Maternal and Child Health Bureau (Title V, Social Security Act), Health Resources and Services Administration, Department of Health and Human Services.

Young adults with special health care needs and disabilities require up-to-date information about entitlements and services related to education. What do I need to know to guide families and young adults?

- Families may not know that transition is a required component of their child's educational program.
- As adolescents become older, legal protections and entitlements change for the student with special health care needs.
- Providers need to know the laws that apply and resources available for educational planning.

TRANSITION EDUCATION

Background

Both federal and state governments have laws to guide the delivery of educational services to children with special health care needs and disabilities. These services can begin at any age up to age 22. Depending on the nature and timing of a diagnosis or special need, a child or young adult may be eligible for a program of therapeutic, educational and support services.

The Individuals with Disabilities Education Act (IDEA) (PL. 101-476) is the federal special education law. In Massachusetts it is carried out through Chapter 766, the state special education law. Students with a wide range of disabilities may be eligible for special education and related services. These disabilities may include speech impairment, serious vision and hearing problems, learning disabilities, mental retardation, emotional problems, or physical disabilities. There is state-to-state variation in the way in which a child qualifies for special education services, but in general, if a child has a disability that interferes with learning, he/she is eligible to obtain an evaluation to determine services needed.

Federal law mandates that educational planning be documented. The Individualized Education Program (IEP) is required for all students receiving special education services. The IEP outlines the student's educational goals and defines the services or types of assistance that will be provided for the child to meet these goals.

Beginning at age 14...

Beginning at age 14 and updated yearly, a statement of transition service needs must be included in the IEP. At 14, the statement focuses on the student's course of study and instruction (such as participation in advanced placement courses or a vocational education program). Also, starting at age 14 the student has a legal right to be present and participate in the education planning meetings required by Chapter 766. If the family and the school team agree, however, the student may be present before age 14.

Beginning at age 16...

At age 16 (or younger if determined appropriate by the IEP team), a statement of needed transition services must be included in the student's IEP. This statement focuses on the goals, objectives, activities and services related to transition for students with special health care needs and disabilities. These are to be integrated into the body of the student's IEP; there is no specific form to be filled out. Transition services must consider instruction, related services, community experiences, development of employment and other post school adult living objectives and, if appropriate, acquisition of daily living skills and functional vocational evaluation. The statement of needed transition services should also include any interagency responsibilities or needed linkages.

Civil Rights law...

There is federal legislation that protects the civil rights of people of all ages with physical or health impairments. Section 504 of the Rehabilitation Act of 1973 (PL.93-112) prohibits discrimination against individuals solely on the basis of their impairment. The law allows people to request accommodations in school or on the job and prevents exclusion from programs supported by federal dollars. A student who is not eligible for special education services may be eligible for 504 accommodations. Section 504 does not, however, entitle the student to the kind of transition services that are associated with special education.

After high school...

Massachusetts does have a law, Chapter 688, which ensures a two-year planning process for individuals who will continue to need supportive services after school, and provides for transition from school-based services to services provided by agencies such as the Department of Mental Retardation. Two years prior to graduation or turning age 22, a Chapter 688 referral should be filed for all students requiring adult agency support. An Individual Transition Plan (ITP) is required for students who are deemed eligible for adult agency support services. The ITP outlines the services and supports needed, and identifies the agency responsible for providing them. However, it is important to note that delivery of services identified on the ITP are linked to program and funding availability and are not guaranteed. The special education service entitlement ends when the young person turns 22 or leaves school.

Understanding the Issues

- Starting early to plan and set goals provides a framework for education and improves educational outcomes.
- An education beyond high school can benefit many students, even those who are not academically oriented. A program such as a community college provides a supportive environment in which young adults can continue to expand their horizons, practice independent living skills, and gain new knowledge.
- Families need encouragement and support to begin the process early. It is hard for families to keep sight of how quickly their adolescent's future is unfolding. It is also difficult for families to plan for the future early, when they are so busy focusing on current needs.
- Providers who have built trust with families over time can provide support and encouragement and point families toward resources.
- Providers can play a role in development of the Individualized Education Program (IEP) by sharing health information and describing how a child's health needs impact learning and service needs.
- Starting at age 14, the student has the legal right to be present and participate in educational planning meetings required by Chapter 766. Families may choose to have the student attend at a younger age.
- At age 18, the adolescent becomes responsible for decisions regarding his/her education unless the family has petitioned the court for guardianship or the student has chosen to share or delegate decision-making to a parent. Providers can help families examine whether joint decision-making about the IEP or other legal issues is appropriate.
- Federal law mandates that transition planning begin at age 14. At age 16, needed transition services should be included in the IEP.
- Families need to be aware that services provided as part of the IEP end when the young adult reaches age 22 (or leaves school).
- For the student who withdraws from high school or graduates with a diploma before the age of 22, special education entitlements end.
- Part of transition planning includes identifying appropriate educational, vocational, independent living and post-secondary options.

Next Steps

- 1. Review the Transition Checklist and Timeline (pp. 17-19)**
- 2.** We have included information sheets to share with families and the adolescents you treat. We recommend that you photocopy the following materials and distribute them to the suggested audience.

Handout	Family	Adolescent
Education Family Sheet (pp. 33-34)	✓	
Taking Charge of Your Education (pp. 35-36)		✓
Planning for Education after High School (p. 60)	✓	✓
Potential Consultants to the Transition Team (p. 61)	✓	✓
Massachusetts State Resources (pp. 63-67)	✓	
References and Suggested Readings (pp. 71-73)	✓

Family Sheet

Parents devote enormous amounts of energy, time and emotion to finding the right school programs, working with schools and helping their children learn.

Your adolescent should play an increasing role in the educational planning process, attending team and IEP meetings, becoming involved in transition planning, and being his/her own advocate. This shift of responsibility from family to teen, called for in federal law, reinforces your adolescent's growing independence.

Families need to start the educational transition planning process by the time their adolescent is 14 as reflected by requirements of federal law. This does not mean that final decisions need to be made by this age. But by starting to pay attention to the issues, being aware of the choices and taking one step at a time, families can build for their adolescent's future.

Read these tips now, and then reread them later to remind you of what it takes to create a smooth and effective educational transition plan.

- Begin early so you will have more time to plan, explore, and experience options.
- Initiate discussions with your adolescent about dreams for the future. Let his/her vision drive planning.
- Plan over a period of time but initiate discussion about educational goals and plans within your family at around age 13.
- Remember that your adolescent has a legal right to participate in school team meetings starting at age 14. You may choose to include your child at an earlier age.
- Beginning at age 14 the student's school team must address and include transition planning in the IEP. Planning should focus on the student's course of study and instruction (such as participation in advanced placement courses or a vocational education program).
- Beginning at age 16 a statement of needed transition services must be included in the student's IEP. It should focus on the goals, objectives, activities, and services related to transition. Needed linkages among agencies should be identified.
- Remember that transition services must be based on your adolescent's preferences and interests.
- Transition services should address: instruction, related services, community experiences, post high school plans and any functional vocational evaluation and daily living skills needed, if appropriate.
- At age 18, a student becomes responsible for making all decisions about medical and educational programs and services. Parents no longer have decision-making authority unless guardianship or conservatorship has been legally established or other arrangements have been made with the team and documented.
- For students who will continue to need services as adults, the law requires that a two-year planning process must begin prior to graduation or turning 22. An Individual Transition Plan (ITP) must be developed. This ITP outlines service needs and identifies responsible agencies.

- Be aware of federal and state laws to guide delivery of educational services to children with disabilities and special health care needs. If a child is eligible for special education, these services can begin at any age and continue to age 22.
- Educate yourself about both special education laws and Section 504 of the Rehabilitation Act of 1973.
- Remember that even a student who is not eligible for special education may be eligible for 504 accommodations such as large print books, books on tape or extra time for test taking.
- Put together a student personal file including:
 - Individualized Education Program (IEP)
 - Team meeting notes
 - Evaluations and assessments
 - Records/notes about any services, interventions
 - Notes from any meetings related to special education
 - Copies of any letters concerning services
- Help your child put together a portfolio that presents his/her schoolwork and work done outside of school such as:
 - projects from recreational programs
 - vision statement
 - art work
 - school work sample
 - community activities
 - clubs/organizations
 - awards/commendations
- Be aware that all special education services will end when your adolescent reaches age 22 or when he/she graduates with a diploma or withdraws from high school.
- Remember that an important part of transition planning includes identifying appropriate educational, vocational, and independent living options.
- Ask your adolescent's health care providers (doctors and school nurses) to participate in the educational planning process by sharing information and resources.
- Network with other families who have already been through the educational transition process.
- Develop a list of disability organizations and written resources on education that may be helpful.
- Request school team meetings that will specifically focus on transition planning issues. The first part of any team meeting should focus on transition.
- Learn about the role of the educational consultant or advocate. Ask the Dept. of Education for information.

Transition Education

Taking Charge of Your Education:

A handout for adolescents and young adults
with special health care needs and disabilities

Get to know your rights

- Learn about your rights. You are your best advocate. Call the Federation for Children with Special Needs for information.
- You are in the driver's seat. Make sure your transition planning is driven by you!!
- Attend school team meetings. Consider asking to start the meetings by telling people about your goals, dreams and by sharing examples of your work.
- At age 14 the law says that you have a right to participate in school team meetings. You may even attend at a younger age, with the permission of your family and school staff.
- Ask about accommodations. You may be entitled to accommodations in school because of your special health care need or disability, even if you are not eligible for special education.
- Be aware that if you leave high school or graduate before you are 22, you will stop receiving special education services. Special education services end for everyone at age 22.
- Know that when you reach age 18, you have the right to approve your own Individualized Education Program (IEP). You and your family may decide to share decision-making or to have your family continue to approve the plan until you reach age 22.
- Start talking to agencies that might help you as you get older.

Start thinking about whether you want or need more schooling after high school

- Think about the kind of job you would like to have as an adult. The earlier you begin to think about this, the more steps you can take to reach your goals.
- Talk with your family, your guidance counselor, and other adults you trust about your dreams, and the kind of preparation that you need. What types of classes should you take in high school? Will you need more schooling after high school?
- Even if you don't want a degree, you can learn a lot by attending classes at a community college.
- Find out about different educational programs after high school: vocational programs; colleges; technical training programs; and adult and continuing education programs. Learn what it takes to get into one of these programs or schools.
- Arrange to visit different schools to make sure they meet your needs and physical challenges.

Put paperwork together that will help you reach your goals

- Keep your own notes and records from school team meetings that you attend.
- Save examples of your schoolwork and other items that show the kind of work you have been doing, your interests and strengths. Include examples of your life in your community, clubs/organizations.
- Make a list of disability organizations and other places that can help you in planning and paying for any future education.

Think positive, plan ahead, talk to people who can help you...

Produced by the Institute for Community Inclusion at Children’s Hospital, Boston, as part of the Massachusetts Initiative for Youth with Disabilities, a project of the Massachusetts Department of Public Health. Supported in part by project #HO1MC00006 from the Maternal and Child Health Bureau (Title V, Social Security Act), Health Resources and Services Administration, Department of Health and Human Services.

Young adults with special health care needs and disabilities can work. What can I do to link young adults with special health care needs and disabilities to employment resources?

- The role of the primary care provider is to encourage adolescents to pursue employment opportunities.
- The provider can also share resources and make connections to community agencies that will help to access employment options.

TRANSITION EMPLOYMENT

Background

Many young adults with special health care needs and disabilities are employed. Some work in full-time jobs, some part-time and some in temporary or seasonal jobs. The option of employment is a viable one and needs to be talked about as such. Employment is feasible for a teen with disabilities. Early work experiences lay the foundation for the development of life long skills.

Up until the time their children reach 21 years of age, parents of adolescents with special health care needs and disabilities are often focused on the educational needs of their child. Youth with special health care needs and disabilities are entitled to educational services, under federal and state mandates. There are no such entitlements to ensure adequate employment for young adults. However, the Americans with Disabilities Act (ADA) (PL. 101-336) prohibits discrimination against individuals with disabilities in the employment arena. This act applies to all employers with 15 or more employees. The ADA also requires reasonable accommodations to remove obstacles in the workplace that prevent people with disabilities from applying for or performing jobs.

The Individuals with Disabilities Education Act (IDEA) requires transition planning starting at age 14. Individualized transition planning should identify goals and objectives based on the student's own choices, strengths, likes and personal vision statement. Local and state agencies, including the state vocational rehabilitation agency and state agencies involved in services for individuals with special health care needs and disabilities, may participate in the individualized transition planning process.

Providers need to guide families and adolescents to supports and services needed for entry into the work force. Services may range from resume preparation, vocational assessment, job placement assistance or coaching on the job site, to travel training, benefits management, and employment counseling.

A certain percentage of students with more severe disabilities will continue to need assistance after age 22 when special education ends. Chapter 688 is a Massachusetts state law which provides for development of a transitional plan before a student reaches age 22, to help him or her access adult services. While the plan identifies the supports a student will need, entitlement to adult services does not exist and availability is subject to state appropriation.

Health Insurance and Public Benefits for Adults with Disabilities

The CommonHealth program under MassHealth makes health care coverage available to people with disabilities, even if they work and receive income. Youth under age 19, or adults 19 or over, who have disabilities and work 40 hours or more a month, may qualify for CommonHealth. This allows the employed individual to buy MassHealth insurance on a sliding scale. To apply for this coverage, contact the Division of Medical Assistance (DMA) at 1-888-665-9993 to request a Medical Benefit Request (MBR) Form and Disability Supplement for CommonHealth.

Social Security Administration Programs

The Social Security Administration has two programs that can benefit young adults with disabilities: Supplemental Security Income (SSI) and Social Security Disability Income (SSDI). Supplemental Security Income is a federal program that provides cash benefits to people with disabilities who have low income and limited assets. SSI allows for children under 18 years of age with disabilities to qualify for cash benefits and Medicaid. For children under 18 years of age, the parents' assets and financial income are counted toward eligibility. Young adults who are older than 18 years of age and have a disability are eligible to receive monthly payments if they are low income and have limited assets. The families' assets and income are not counted toward eligibility when the young adult is over age 18 years. Those qualifying for SSI also receive Medicaid insurance. Hospital costs, medical, dental care and medications are covered under this plan. Individuals who are SSI recipients as children will need to go through a re-determination process at 18 years of age to insure they meet the adult standard of disability.

Social Security Disability Insurance (SSDI) is a federal program administered by the Social Security Administration. SSDI provides cash benefits to young adults with disabilities whose parents are retired, disabled, or deceased. For a young adult with a disability, eligibility for SSDI is based on the parent's work record and how much the parent "paid into" Social Security through previous employment. SSDI is also available for adults with disabilities who are unable to work, but have made contributions to Social Security through their previous employment. A person who is eligible for SSDI benefits becomes eligible for Medicare automatically after 24 months.

The Social Security Administration has developed a variety of work incentives for people receiving SSI or SSDI benefits. These incentives enable people with disabilities to enter the workforce and receive a paycheck and still maintain their SSI or SSDI benefits and/or eligibility and the Medicaid or Medicare coverage that goes with it. Some of the SSI work incentives can even increase their net income to help cover special expenses. There are special work incentives for students under the age of 22 and individuals who are blind. These work incentives provide a wonderful opportunity for people with disabilities who want to test their ability to work but are fearful of losing benefits. *(For additional information on SSI, SSDI and work incentives, contact the Social Security Administration.)*

Understanding the Issues

- Health care providers can provide encouragement, guidance, support and information resources concerning employment to young adults and their families.
- Long term planning needs to begin early to ensure that students take the courses and acquire the skills they need to reach their goals.
- Most people with disabilities and special health care needs and disabilities want to work. The encouragement providers and families give is most effective when it begins at an early age.
- Employment while the student is still in school can provide a chance to learn first-hand about the work world and develop important job-related skills.
- Early job experiences provide opportunities to develop new relationships with peers and adults. The ability to form work relationships is critical for adult life.
- Young adults with disabilities and special health care needs and disabilities need special support and assistance to enter the workforce.
- Some students may want to focus on post-secondary education as a way to prepare for their careers. Others may enter the workforce directly.
- At age 18, the adolescent becomes responsible for making decisions concerning his/her special education program unless the family has petitioned the court for guardianship. The adolescent and family may also choose joint decision-making; providers can help families to examine whether this is appropriate.
- There is a wide range of employment-related services available for students with disabilities. These include general employment programs, and disability-focused programs.
- It is important to understand the financial aspect of employment for adolescents with disabilities. Benefit programs which may support or be affected by employment are: Supplemental Security Income (SSI), Social Security Disability Income (SSDI), and Work Incentives such as Plans for Achieving Self Support (PASS) and Impairment Related Work Expenses (IRWE).

Next Steps

- 1. Review the Transition Checklist and Timeline (pp. 17-19)**
- 2.** We have included information sheets to share with families and the adolescents you treat. We recommend that you photocopy the following materials and distribute them to the suggested audience.

Family Sheet

It is possible for adolescents with special health care needs and disabilities to find employment after they leave school, given proper planning and preparation. Different approaches work for different teens. Some adolescents go directly from high school to a job. For some, this transition involves linking the adolescent to supports such as job coaching. Other adolescents go on to further education past high school.

Adolescents need encouragement to become their own advocates in the employment area. Families can help adolescents think about channeling their interests, strengths and talents into a job. Adolescents need to find ways to learn about job possibilities and opportunities. They need to connect with and learn from others who have entered the job market. Families can encourage them to discuss their plans with guidance counselors, teachers and medical providers. All adolescents will benefit from the attention paid to the development of job skills and experiences.

Read these tips now, and then reread them later to remind you of what it takes to create a smooth and effective transition to employment.

- Begin thinking about work early. Children can learn about the world of work as early as preschool by watching family members, and helping out at home.
- Adolescents with special health care needs and disabilities can work.
- Identify early on the supports and services that your adolescent will need in order to be successful in the workplace.
- Discuss personal likes, strengths, abilities and the future goals of your adolescent.
- Encourage your adolescent to be his/her own advocate.
- Incorporate activities in the home, school and community that build on strengths and develop new skills.
- Involve your adolescent in the transition planning process by having him/her attend school meetings and review the IEP. Legally, he/she has the right to attend starting at age 14.
- Beginning at age 14 and updated yearly, a statement of the transition service needs must be included in the IEP. At this early stage, the statement focuses on the student's courses of study and instruction (such as participation in advanced placement courses or a vocational education program).
- Beginning at age 16 (or younger if determined appropriate by the IEP team), a statement of needed transition services must be included in the student's IEP. This statement focuses on the goals, objectives, activities, and services related to transition. It also identifies any needed linkages among agencies.

- Remember that transition services must be based on your adolescent's preferences and interests. Make sure transition services address: instruction, related services, community experiences, post high school plans and any functional vocational evaluation and daily living skills needed, if appropriate.
- Contact family advocacy and employment support organizations to learn about community and state agencies .
- Understand that employment services can range from resume preparation, job placement assistance, and employment counseling, to job coaching, travel training, and benefits management.
- Discuss supported employment options with your adolescent. Supported employment offers work experiences for people with disabilities by placing them in settings with training and support.
- Consider having your adolescent participate in a vocational assessment as a way to focus in on work-related interests, abilities and strengths.
- Contact the Social Security Administration or the Department of Public Health about programs that may offer financial assistance.
- Learn about the state regulations regarding employment for people with disabilities.
- Notify appropriate adult service agencies when planning for transition. Vocational rehabilitation and developmental disabilities organizations should be involved in transition planning.
- Ask your school about local work training programs that can help provide support, job coaching and training to the adolescent.
- Understand that employment training is an important part of the Individualized Education Program.
- Make job placement an integral part of your adolescent's education plan.
- Remember that work experience can be helpful for all transition-age youth, including students planning to go to college.
- Encourage self-care such as personal grooming, hygiene, money management, and physical fitness.
- Encourage your adolescent to participate in volunteer activities in order to learn about possible job opportunities and to develop job skills.
- Discuss with your adolescent and service provider the types of job accommodations your adolescent will need in the workplace.
- Contact the local Social Security Office to learn about the impact of earnings on your son or daughter's benefits and to learn about Social Security Work Incentives.

Transition Employment

Taking Charge of Getting a Job:

A handout for adolescents and young adults
with special health care needs and disabilities

You CAN work!

- ③ Think about your future. What do you want to be when you grow up?
- ③ Identify what you are good at doing and what you like to do.
- ③ Learn about the responsibilities involved in having a job.
- ③ Think about how your special health care need or disability might affect the kind of job you can do.
- ③ Will you need accommodations? Accommodations are supports or assistance to make it possible for you to work.

Be your own advocate...Speak up for yourself!

- ③ Be a part of the transition planning process at school.
- ③ Attend all of the team meetings related to planning for your future and your Individualized Education Program (IEP). Start the meeting by telling people about your dreams and goals; share examples of your work. Help them get to know you.
- ③ Ask a friend, parent or relative to come to planning meetings with you to help take notes, listen to what is said, or contribute ideas.
- ③ Make sure your teachers and guidance counselors know what your interests are.
- ③ Ask questions and speak up! Let people know what you want to do and what you need.

Preparing for a job

- ③ Look for job opportunities. It's important to start thinking about work early.
- ③ Ask your parents, guidance counselors, doctor or nurse about agencies that might help you plan for a job.
- ③ Consider getting an after school or a weekend job to earn money and get experience.
- ③ Talk to your doctor about how your disability may influence the type of job you choose.
- ③ Learn about supported employment. Supported employment means work in a community setting with ongoing support by an agency that knows how to help people with disabilities find jobs.

- 
- Find out about having a vocational assessment, which will help you understand your work preferences, strengths and abilities.
 - Try a volunteer job in your community that matches your interest.
 - Think about shadowing someone to learn about jobs. Job shadowing means observing someone “on the job.”
 - Look for an opportunity to have an adult with a disability who works in the area you are interested in as a mentor.
 - Make a plan for transportation to your job. Will you drive yourself, use public transportation or a taxi service?

Make sure you look your best and dress appropriately for the work setting

Every adolescent should have recreational opportunities. What role do I play in encouraging families of adolescents with disabilities and special health care needs to identify and pursue social and recreational activities?

- Recreation and having fun reduce stress. Research indicates that stress and social isolation impact health negatively.
- Recreational activities provide opportunities for fitness and socialization and add fun to life.

TRANSITION RECREATION

Background

The passage of the Americans with Disabilities Act (ADA) in 1990 affirmed the rights of youth with special health care needs and disabilities to participate in recreation as part of the community at large, rather than in segregated activities only. The reauthorized Individual with Disabilities Education Act in 1986 (IDEA) specified that all services must be offered in the least restrictive environment. The phrase “least restrictive environment” generally means that children and youth with special health care needs and disabilities should receive their education or recreation services with children who do not have special health care needs and disabilities, whenever possible.

Inclusive recreation makes individuals with special health care needs and disabilities active participants in community settings. However, families interested in inclusive recreation may find such programs limited or find that program staff are not prepared for the participation of adolescents with special health care needs. It is important for adolescents to have a full range of recreational options. Therefore, facilities need to be accessible, and staff must be trained to work with adolescents with special health care needs. Parents, providers and adolescents, through their initiatives, can remind and emphasize to the recreational programs the need to address these aspects.

Adolescent recreation, however, is more than structured programs organized by communities. Recreation is any activity that helps a person to rejuvenate, explore or relax. Rewarding recreational experiences can happen right in the adolescent's home. Welcoming peers into the home is a way of sharing experiences. Listening to a CD or watching a video are every bit as valuable as some structured activities. Adolescents often want to spend time with other adolescents who have special health care needs and disabilities similar to theirs. Providers can help link families together to achieve these special connections.

Understanding the Issues

- Adolescents and families have rights under ADA and IDEA to inclusive recreation.
- All adolescents want and need to participate in recreational activities that allow them to have fun, learn new skills and develop friendships.
- Recreation and having fun reduce stress. Research indicates that stress and social isolation can impact health negatively.
- Enjoying one's interests and friends creates positive attitudes. Positive attitudes are important for staying healthy and leading a productive and fulfilling life.
- Providers can help families focus on their adolescent's strengths as they plan recreational experiences.
- The primary care provider can play a role in recommending activities that are compatible with the adolescent's health issues.

Next Steps

1. **Review the Transition Checklist and Timeline (pp. 17-19)**
2. We have included information sheets to share with families and the adolescents you treat. We recommend that you photocopy the following materials and distribute them to the suggested audience.

Handout	Family	Adolescent
Recreation Family Sheet (pp. 51-52)	✓	
Taking Charge of Having Fun (pp. 53-54)		✓
Massachusetts State Resources (pp. 63-67)	✓	
References and Suggested Readings (pp. 71-73)	✓

Family Sheet

Recreation is more than planned programs that happen in a park or gym. Recreation is any activity that helps a person to explore or relax or have fun. Recreation can happen in the home, on the playground or in a community setting.

For the adolescent with special health care needs, recreation is especially important. The benefits of relaxation, of social connections, and of using minds and bodies in different ways are enormous. Families need to help their adolescent find recreational opportunities. Inviting friends into the home is one way. Shared experiences of listening to a CD or watching a video are every bit as valuable as some structured activities. It helps to know where adolescents gather outside school: the sporting events they attend, the pizza shops they go to; these are all places where they could make friends. Also, it can be important for adolescents with special health care needs and disabilities to spend time with others who have special needs.

Read these tips now, and then reread them later to remind you of what it takes to create rewarding recreational experiences.

- Highlight your adolescent's strengths and interests, not his/her disability.
- Keep fun in your family. Don't forget about the benefits of recreation.
- Create opportunities for your adolescent in your own home as well as in your community.
- Notice what excites your adolescent.
- Make friendships a priority. Adolescents need other adolescents to talk to and share their life with.
- Include recreation in transition planning. Make this a subject for your team meeting.
- Discuss with your adolescent's primary care provider any health-related limitations your adolescent may need to consider when planning recreational activities.
- Identify your adolescent's need for accommodations.
- Encourage your adolescent to "try out" different activities to see what he/she enjoys.
- Interview organizations such as the local YMCA to see if the recreational activities available are a good fit for your adolescent. Teach them about any adaptations or accommodations your adolescent might need to participate in recreation activities.
- Visit the facility where a recreational activity is going to take place to promote proper planning.

- Work with staff of recreation programs to adapt the program to your child's special needs.
- Ask other parents about their successful recreational experiences. Work with other parents to create new recreational options where they don't exist.
- Check out the school or local library for flyers on adolescent activities in your community.
- Surf the Internet. Many communities have recreational Web sites.
- Look in the calendar section of your local newspaper for events close to home where your adolescent can meet other teens.
- Consider the following as contacts for learning about recreational opportunities:
 1. City/town recreation department
 2. Chamber of Commerce
 3. Cultural council in your town or city
 4. Colleges and universities
 5. Health and fitness clubs
 6. YMCA/YWCA
 7. United Way
 8. Easter Seals
 9. Boy/Girl Scouts
 10. Parks and beaches in your local area
- Join condition-specific organizations where adolescents can meet other adolescents with special health care needs.
- Consider participating in a recreational or fitness activity as a family.

Transition Recreation

Taking Charge of Having Fun:

A handout for adolescents and young adults
with special health care needs and disabilities

Meet people...make friends

- 1 Work at making friends; it isn't easy for anyone. Reaching out is hard, but it's worth the effort.
- 2 Join clubs or committees that you are interested in. This is a good way to meet people.
- 3 Get to know what other kids are interested in: movies, music, clothes.
- 4 Figure out the people at school who can help you connect with other teens such as a teacher or guidance counselor.
- 5 Go to school functions such as school dances, plays or sports events.
- 6 Spend time with friends with disabilities and special health care needs.
- 7 Spend time with friends who do not have disabilities and special health care needs.

Enjoy recreation in your community

- 1 Try out different activities to find out what you might enjoy.
- 2 Call organizations such as the local YMCA to see if their activities are a good fit for you.
- 3 Visit the place where the activity may be held so that you can plan accordingly.
- 4 Identify your need for accommodations.
- 5 Work with the recreation staff to adapt the program for you.
- 6 Discuss with your doctor any health-related issues you should consider when planning your activities.

Have fun at home

- 1 Keep fun in your family. Take time to enjoy yourself with your family.
- 2 Think about activities you'd like to do at home with a friend.
- 3 Invite friends to your home.
- 4 Ask your parents to let you bring a friend along when you go to places such as the movies.
- 5 Include your friends in activities that you do at home.
- 6 Consider participating in recreation or fitness activities with your family.

Know where to get information about recreational experiences

- Check out the school or local library for flyers on upcoming activities.
- Ask other adolescents about activities they enjoy and participate in.
- Surf the Internet. Many cities and towns have recreational Web sites.
- Look in the calendar section of the newspaper for events close to home.
- Join a group where you can meet other adolescents with special health care needs and disabilities.
- Consider the following as good places to find out about activities:

- | | |
|---------------------------------------|--|
| 1. City/town recreation department | 6. YMCA/YWCA |
| 2. Chamber of Commerce | 7. United Way |
| 3. Cultural council in your city/town | 8. Easter Seals |
| 4. Colleges and universities | 9. Boy/Girl Scouts |
| 5. Health and fitness clubs | 10. Parks and beaches in your local area |

Recreation allows you to meet new people, learn new things and stay fit...Don't forget to have fun!

Communicating with Doctors and Other Health Care Providers

Talking to doctors and other health care providers can be difficult, overwhelming and, at times, scary. What advice would you give someone going to the doctor? Here are some tips to help you communicate with health care providers. These tips were suggested by adolescents in the “Making Healthy Connections” program.

- ☼ Make sure to **ask for a long enough appointment**. Sometimes appointments are very rushed. If you know that you will have a lot to talk about with your doctor, ask for an extended appointment so you don't run out of time.
- ☼ **Tell your doctor everything you can about yourself, what you do, and how you feel**. The more information the doctor has, the more helpful he/she can be.
- ☼ Bring a **list of questions and concerns**. It's easy to forget things when you're sitting there, in the doctor's office. A written list of questions, concerns, or other things you want to make sure to tell the doctor will help you remember everything that's been on your mind.
- ☼ **Say what you think**—and be honest.
- ☼ Tell the doctor to be honest and to tell you everything. **You're entitled to know all** about your condition, your treatment, and any options that might be available to you.
- ☼ **Be assertive**. Be nice, but persistent.
- ☼ **Ask questions**. Remember—there's no such thing as a stupid question. If you don't understand an answer to a question, ask the doctor to explain it again until you do understand it.
- ☼ **Write down what the doctor says**. That will help you remember later on.
- ☼ **Bring someone with you**, if you'd like. Sometimes it helps to have someone else there for support, to hear what the doctor has to say, or to ask questions that you might not think of.
- ☼ Ask your parents to wait outside the exam room so you **have some time alone to talk to the doctor, if you'd like**. Sometimes that helps the doctor focus on you and what you have to say. Your parents can come back in after you've had a chance to talk to the doctor yourself. Then they can ask their questions.
- ☼ **If you need help, ask for it**.
- ☼ When visiting a new doctor, **ask the doctor about his/her background and experience**.
- ☼ Even if you've seen your doctor for a long time, **it's ok to ask about the doctor's background** and what his/her experience has been.
- ☼ Call back if you have any questions after the appointment. Sometimes questions come up after you get home, or you forget something the doctor said. **It's ok to call and follow up with more questions**.
- ☼ **Learn about your insurance coverage**. What services are covered and what procedures do you have to follow to get those services?

Health Care Skills Checklist

Note: This health care checklist can be used to set goals for achieving independence in managing one's own health.

Skill	Performs Independently	Performs Partially	Needs Practice	Plan to start	Skill Accomplished	Comments
Describes chronic illness or disability	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Understands implications of chronic illness/disability on daily life	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Accesses medical records, diagnosis information, etc.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Prepares and asks questions for doctors, nurses, therapists	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Knows medications and what they're for, or carries information in wallet	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Is responsible for taking own medication	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Is responsible for doing own treatments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Gets a prescription filled/refilled	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Calls to schedule own medical/dental appointments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Keeps a calendar of medical appointments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Knows transportation to medical office	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Knows height/weight, birthdate, or carries information in wallet	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Knows how to use and read thermometer	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Knows health emergency phone numbers, or carries info in wallet	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Knows medical coverage numbers, or carries information in wallet	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Knows about medical insurance coverage	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Skill	Performs Independently	Performs Partially	Needs Practice	Plan to start	Skill Accomplished	Comments
Obtains sex education materials/birth control/family planning information as needed	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Discusses role of general health maintenance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Has considered genetic counseling if appropriate	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Knows about how drugs/alcohol affect illness/disability	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Makes contact with appropriate community advocacy organizations	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Takes care of own menstrual needs and keeps a record of monthly periods	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Has considered the need for a health advocate	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Has identified a physician for adult care	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
Knows how to hire and manage a personal care attendant	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

Planning for Education after High School

What Does This Student Need?	Actions the High School Transition Team May Recommend
ASSESSMENT that identifies strengths, needs, interests, preferences for post secondary education	<ul style="list-style-type: none"> ✓ Assess student's self-advocacy skills, academic preparation, and college bound test scores ✓ Assess student's technical skills, social skills, independent living skills. ✓ Interview youth regarding educational setting interests and preferences: size, setting, programs. (Use other methods to assess interests and preferences if student is nonverbal) ✓ Identify youth's long-term career goals ✓ Develop a list of supports student needs to achieve post secondary education goals ✓ Discuss health care issues that may impact student in post secondary setting ✓ Identify needed natural supports, academic or physical accommodations, and support services
DEVELOPMENT of post secondary education options	<ul style="list-style-type: none"> ✓ Visit campuses ✓ Participate in college night ✓ Have college students with disabilities talk to youth ✓ Research colleges and universities that offer special services to students with disabilities ✓ Discuss financial issues ✓ Discuss preferred location of college
MATCHING of student and post secondary education setting	<ul style="list-style-type: none"> ✓ Analyze the demands and expectations of the post secondary education setting—accessibility, support services availability, academic rigor, social culture, independent living setting ✓ Match the student's assessment and list of needed supports to the demands of the post secondary education setting
PREPARATION for post secondary education	<ul style="list-style-type: none"> ✓ Provide developmental academic support and coursework needed to prepare for post secondary education goals ✓ Assist youth with applications, interviews, and test preparation ✓ Identify potential service providers ✓ Develop natural supports ✓ Provide self-advocacy training
PLACEMENT and FOLLOW-UP	<ul style="list-style-type: none"> ✓ Monitor progress in the post secondary setting ✓ Monitor changing need for natural supports ✓ Monitor changing need for services ✓ Advocate for changes and adjustments, as needed

Potential Consultants to the Transition Team

Potential Consultant	Relationship to Transition Services
Adult Education Representative	Provides information about lifelong education options
Advocacy Organization(s) Representative	May offer self-advocacy training or support groups for young adults
Assistive Technology Representative	Provides expertise on devices that can open doors to opportunities
At-Risk/Prevention Specialist	Offers counseling and support on teen pregnancy, alcohol, and drugs
Business-Education Partnership Representative	Provides links between schools and local businesses and industry
Community Action Agency Representative	May link team to resources for traditionally underrepresented groups
Correctional Education Staff	Provides incarcerated youth with continued learning opportunities
Drop-Out Prevention Representative	Provides youth with alternatives to dropping out of school
Employer	Offers insight into expectations; promotes hiring of people with disabilities
Employment Specialist	Provides job development, placement, coaching
Extension Service Agent	Offers programs in parenting, homemaking, independent living
Guidance Counselor	Provides info on curriculum, assessment, graduation requirements, college
Health Department/ School Nurse	Provides guidance on community health services and health care advice
Higher Education Representative	Provides information on post secondary services to students with disabilities
Housing Agency Representative	Assists in developing housing options
Leisure Program Representative	Knows available program options within the community
Literacy Council Representative	Coordinates volunteers to teach basic reading and writing skills
Local Government Representative	Funds many local services; can provide information on local services
Local Disability Representative (e.g., UCP)	Provides information and training (often serves all disabilities, not just one)
Parent Training Information Center Rep.	Provides training on transition planning and advocacy services to families
Religious Community Member	Can provide social support to young adults and their families
Residential Service Provider	Can help access specialized housing
Social Worker	Provides guidance and arranges for case management, support, respite care
Special Olympics Representative	Provides sports training, competition, and recreational opportunities for youth
Therapists	Provide behavioral, physical, occupational, & speech services in the community
Transportation Representative	Offers expertise about transportation options and training
United Way Representative	Funds many community programs that may offer options for young adults
Very Special Arts Representative	Provides information on art programs and opportunities for youth
Vocational Educator	Provides job training; teaches work-related skills
YMCA/YWCA	Offers recreation and leisure programs

Let Your Fingers Do the Walking in Transition Planning

White Pages

The Table of Contents may include references such as “Community Service Numbers” or “Disabilities, Services for Individuals with.”

Some of the headings you will find that might relate to the varying service needs of youth with disabilities include:

- ☉ Adult Protection
- ☉ Disabilities Services
- ☉ Education
- ☉ Employment
- ☉ Financial Aid
- ☉ Handicapped/Disabled
- ☉ Housing
- ☉ Human Rights
- ☉ Human Services
- ☉ Mental Health & Mental Retardation
- ☉ Recreational/Social Development
- ☉ Rehabilitation
- ☉ Social Security Administration
- ☉ Social Services
- ☉ Transportation
- ☉ Volunteer Opportunities

Blue Pages

Local, state, and federal government listings can always be found in the Blue Pages of the phone book.

Local Listings might have some of the following headings:

- ☉ Employment Opportunities & Information
- ☉ Housing
- ☉ Human Resource Management
- ☉ Mayor's Office on Disability
- ☉ Social Security

State Listings might have some other headings:

- ☉ Children
- ☉ Clinics
- ☉ Education
- ☉ Health Services
- ☉ Housing
- ☉ Labor
- ☉ Libraries
- ☉ Museums & Theaters
- ☉ Social Services

Local, State and Federal Government Listings will include numbers for all state and government agencies. Examples of these would be:

- ☉ Employment Commission
- ☉ Medicaid
- ☉ Mental Health
- ☉ Mental Retardation
- ☉ Rehabilitation Services
- ☉ Social Services
- ☉ Transitional Living Center
- ☉ Transportation Department
- ☉ Vocational Evaluation Center

Yellow Pages

Check out the *Index of commonly used terms*. Using key words, here are examples of what you might find:

Disability:

Access Unlimited; Adult Care Services; Assisted Living; Charter's Mobility Center; Paradapt Services

Associations:

Arc; Boy Scouts; Families for Children with Mental Health Concerns; Information & Referral-United Way; Learning Disabilities Council; Neighborhood Housing Services

Mental Health:

Alliance for the Mentally Ill

ABOUT NICHCY STATE RESOURCE SHEETS

NICHCY State Resource Sheets are listings of selected state-wide organizations that can refer people to organizations in their area. We update the state sheets continuously; however, the addresses and telephone numbers of these selected groups are constantly changing. If you find that an address or number has changed or is incorrect, please e-mail us at nichcy@aed.org and let us know. Publication of this document is made possible through Cooperative Agreement #H326N980002 between the Academy for Educational Development and the Office of Special Education Programs of the U.S. Department of Education. The contents of this document do not necessarily reflect the views or policies of the Department of Education, nor does mention of trade names, commercial products, or organizations imply endorsement by the U.S. Government.

Work Incentives Transition Network (WITN)

Understanding the SSI Work Incentives

The Social Security Administration states that one of its “...highest priorities is to help (recipients) with disabilities achieve a better and more independent lifestyle by helping them to take advantage of employment opportunities.” One way that the Social Security Administration supports this goal is by providing benefits called **work incentives** that are designed to help individuals enter employment. This brief summary offers information on the most commonly used work incentives which can help those who receive Supplemental Security Income (SSI) to attain and succeed in long term employment.

SSI is a monthly cash benefit that is available from the Social Security Administration to help low income children and adults with disabilities. People who receive SSI also automatically become eligible to receive Medicaid as a source of medical insurance in most states.

The work incentives have been designed to provide the working beneficiary and recipient with the additional income necessary to move toward financial independence. Brief descriptions of some of these incentives follow below. For more information, it is strongly recommended that you identify a knowledgeable advocate who can help you understand your options, and that you contact your local Social Security office.

Earned Income Exclusion

This allows a portion of a person's salary to be excluded when figuring the SSI payment amount. SSI benefits are adjusted only after a certain level of income is reached:

- ◆ Up to \$85/month of your income has no impact on your SSI check. This is the general income exclusion (\$20) and the earned income exclusion (\$65) combined. The general income exclusion applies to all income from any source, while the earned income exclusion only applies to income from a job.
- ◆ After that, your check is reduced \$1 for every \$2 you earn. So, if you earn \$285 in a month, your check will be reduced by \$100. You still come out ahead.

Student Earned Income Exclusion

This allows a person who is under age 22 and regularly attending school to exclude up to \$400 of earned income per month: the maximum annual exclusion is \$1620. The person must be taking classes at a college or university for at least 8 hours per week; or at a high school for at least 12 hours per week. This exclusion is applied before the general income and earned income exclusions mentioned above.

Blind Work Expense

If a person is on SSI and is blind, expenses needed to earn income that are paid for by the individual (not necessarily related to the disability) can be excluded from the income determination for SSI purposes. Examples of these expenses can include transportation to and from work, federal and state income taxes, union dues, or translation of materials into Braille.

Other Income Reductions

Two additional work incentives allow you to deduct additional money beyond the exclusions mentioned above, under specific circumstances. They are only briefly described here, and are complicated, so you will need to speak to your local Social Security Representative or an advocate for complete details.

- ◆ Impairment Related Work Expenses (IRWE). This allows you to deduct from your earnings any disability-related expenses that are necessary to maintaining your job. This might include personal care assistance at work, job coaching services, or special transportation expenses. You cannot use this incentive if you are reimbursed for the expense by another source such as Medicaid.
- ◆ Plan for Achieving Self Support (PASS). Under the PASS incentive you can save for or set aside SSI or other income for work goals. The range of possible uses is broad and may include education, vocational training, job coaching services, purchase of adaptive equipment, or health club membership to help with

Continued Medicaid Eligibility

(often referred to as “section 1619b”)

This incentive allows you to keep your Medicaid insurance even if your earnings become too high to continue receiving SSI benefits. If you need Medicaid in order to work, your Medicaid benefits will continue until your annual income is greater than a state threshold level. In 1997 the threshold levels ranged from \$12,636 (Arkansas) to \$33,039 (Arizona), and was \$23,538 in Massachusetts.

Continued Eligibility for SSI Cash Payments

Under Section 1619, a person who is eligible for continued Medicaid coverage under 1619(b) can begin receiving SSI cash payments without reapplying at any time earnings drop below the break-even point (the point at which after deducting your earned income you would receive an SSI payment). This means that even if your SSI check drops to \$0 because of your earnings, you can restart it at any time if you lose your job or your income decreases.

Strategies for Managing your Work Incentives

- ◆ Always report changes in earnings to your local office. Otherwise, you risk being overpaid or underpaid in your monthly check, and could owe them a refund.
- ◆ Remember to make all SSA required reports in writing and keep copies of whatever they provide.
- ◆ Confirm your participation in Section 1619a & 1619b, the incentives which allow continued eligibility for SSI and Medicaid. These should be automatic, but are not always. Don't worry! If they mess it up (you'll know if a Medicaid claim is rejected), it can be fixed. Ask for help.
- ◆ Locate an advocate who is familiar with SSI and the work incentive programs. Employment programs usually have at least one person with expertise in this area. In particular, a PASS or IRWE must be approved by Social Security. You may find it helpful to get assistance in developing a PASS or IRWE.
- ◆ Contact or visit your local Social Security Office and get to know the staff there by name. Recognize that not all Social Security staff understand these programs. Always be willing to ask questions or seek other advice.

For Further Information

Further information about SSI and work incentives is contained in the publication *Red Book On Work Incentives-A Summary Guide to Social Security and Supplemental Income Work Incentives for People with Disabilities*. You can get a copy free from your local office, or by calling the Social Security Administration's toll free number: (800) 772-1213.

Call the Social Security Administration at their toll free number to ask questions or request additional information on any SSI or work incentive topic between 7:00am to 7:00pm on any business day.

Planning for Employment

What Does This Student Need?	Actions the High School Transition Team May Recommend
ASSESSMENT that identifies current strengths, needs, interests, and preferences for post-school employment, independent living, and post secondary training and/or education	<ul style="list-style-type: none"> ✓ interview youth regarding vocational interests and preferences (use other methods to assess interests and preferences of nonverbal students) ✓ conduct situational assessment (observation in a work setting) to assess endurance, strength, aptitude, social skills, interests, interactions ✓ conduct formal vocational evaluation by a trained evaluator ✓ self-assessment ✓ develop student's awareness of different jobs ✓ discuss health care issues that may impact employment
DEVELOPMENT of job and job placement options and awareness of skills needed	<ul style="list-style-type: none"> ✓ analyze local labor market (contact employment services for state and request information for the region; contact local vocational advisory council; contact local chamber of commerce; review local want ads; contact employment agencies) to identify job openings and local labor needs ✓ get a range of work experiences; explorations, job shadowing, mentoring, and internships ✓ identify community programs offering job placement or training ✓ build network of employer and community program contact ✓ provide training to employers on issues related to employees with disabilities
MATCHING of student and job	<ul style="list-style-type: none"> ✓ analyze the demands and expectations of the job site (e.g., duties, skills requirements, hours, location, transportation, wages, benefits, social skills) ✓ list the support the student needs to be successful on the job ✓ match the student's assessment and the list of needed supports to the job demands, including transportation to the job ✓ identify current gaps and needs for success ✓ identify needed natural supports, job accommodations, adaptive equipment, and support services
School-Work based TRAINING & PREPARATION	<ul style="list-style-type: none"> ✓ provide instruction to youth on job-seeking skills ✓ provide community-based work experiences related to career development ✓ identify potential service providers ✓ provide natural supports and accommodations ✓ provide instruction & training (pre-employment or on-the-job)
PLACEMENT and FOLLOW-UP	<ul style="list-style-type: none"> ✓ work with employer to determine employee's response to the job demands and identify strategies to capitalize on strengths and minimize limitations ✓ provide natural supports and accommodations ✓ monitor progress and readiness for job advancement ✓ monitor changing need for natural supports ✓ make adjustments, as needed

Summary of the Laws Related to Adolescent Transition

Americans with Disabilities Act (ADA) P.L. 101-336

Passed in 1990 to supplement civil rights provisions of the Rehabilitation Act, ADA prohibits discrimination against individuals with disabilities. This Act applies to all employers (including state and local government) with 15 or more employees, and protects adults and children with disabilities. Places such as hotels, auditoriums, grocery stores, retail stores, public transportation terminals, museums, parks, schools, and daycare centers are covered by the law.

Individuals with Disabilities Education Act (IDEA) P.L. 101-476

This is the federal special education law. This law requires public schools to offer all eligible children with disabilities a free, appropriate, public education in the least restrictive environment appropriate to their individual needs, through age 21. There is state-to-state variation in eligibility for special education services, but in general, IDEA ensures a child who has a disability that interferes with learning the right to an evaluation to determine if services are needed. In 1997 IDEA was amended to include mandates that transition planning begin by the age of 14 years as part of the individualized education planning for all students in special education. By the age of 16, the IEP must include a statement of needed transition services. This statement focuses on the goals, objectives, activities and services related to transition for students with special health care needs and disabilities, and defines the responsibilities of different agencies and any interagency linkages needed for transition services.

Rehabilitation Act of 1973 (Section 504) P.L. 93-112

This federal legislation protects the civil rights of persons with disabilities in federally assisted or run programs, including health or social programs supported by federal dollars. The law defines a person as disabled if he or she has a mental or physical impairment which substantially limits one or more major life activities. This law attempts to prevent exclusion or restriction from educational programs of students with health impairments and entitles students to special accommodations such as modified assignments or testing situations. Section 504 covers a larger group of students with disabilities than do special education laws.

Massachusetts Chapter 766

This is the Massachusetts state special education law. It is similar to the federal IDEA, but establishes guiding principles for special education specifically for this state.

Job Training Partnership Act (JTPA) P.L. 97-300

The Job Training Partnership Act provides funding for people with disabilities to meet expenses associated with employment. Funds can be used for employment services, training, job search and relocation allowance, and work experience.

The Rehabilitation Act
P.L. 102-569

Financial support is provided for vocational rehabilitation through this Act. It is intended to assist persons with disabilities to achieve independence through work and community inclusion.

Technology-Related
Assistance for Individuals
with Disabilities Act P.L.
100-407 and 103-218

This federal law recognizes the need for equipment to help individuals with disabilities perform independently. The law authorizes funding to allow states to create systems of technological assistance.

The Carl D. Perkins
Vocational and Applied
Technology Education Act
P.L. 101-392

This federal law requires that individuals with disabilities be provided vocational education in the least restrictive environment and that they be provided equal access to vocational services including recruitment, enrollment and placement activities.

Massachusetts Chapter
688

This is often referred to as the state's "Turning 22 Law." A certain percentage of more significantly disabled students will continue to need assistance after the age of 22, when Chapter 766 and IDEA no longer apply. Chapter 688 was passed to provide transitional programs for these students before they reach 22 to help them access adult services when they leave the school system. The local education authority must initiate a planning process that will produce an Individual Transition Plan. Services needed, however, are not entitlements, and are subject to appropriation. Many parents are unaware that if a person with a disability has withdrawn from high school or has graduated before reaching the age of 22 they will no longer receive special education services.

Glossary of Terms

Advocate	Term used to describe an individual who is trained to assist families in the development of individualized education plans for their children. There are two types of advocates. (1) Parents may hire a private, independent advocate to support and assist them with the IEP evaluation and appeal process. (2) An Educational Advocate (sometimes referred to as a surrogate parent) may be assigned by the Department of Education to act on behalf of a child when the child's parents are unavailable or have no educational decision-making rights. This person cannot be an employee of any state agency that educates or cares for the child.
Americans with Disabilities Act (ADA)	The ADA (P.L. 101-336) was passed in 1990 to supplement civil rights provisions of the Rehabilitation Act. ADA prohibits discrimination against individuals with disabilities. This Act applies to all employers (including state and local government) with 15 or more employees, and protects adults and children with disabilities. Places such as hotels, auditoriums, grocery stores, retail stores, public transportation terminals, museums, parks, schools, and daycare centers are covered by the law.
Assistive Technology (A.T.)	Refers to assistive technology devices and services. A.T. devices can be simple (velcro, seating systems) or complex (augmentative communication devices). These equipment solutions can improve a student's ability to learn and interact with teachers, family members and friends.
Chapter 766	The Massachusetts state special education law. It is similar to the federal Individuals with Disabilities Education Act (IDEA), but establishes guiding principles for special education specifically for this state. Chapter 766 applies to eligible students with disabilities ages 3 through 21.
Conservatorship	A legal arrangement in which financial oversight is provided for an individual who is able to make non-financial decisions and is not otherwise at risk. If the only finances are monthly benefits, which are handled by a representative payee, then conservatorship is not usually needed.
Evaluations	Tests, assessments, and other critical information about a child that help determine the child's strengths and special needs. An evaluation is done to determine the child's eligibility for special education, and to develop the Individualized Educational Program (IEP).
The Evaluation Team (TEAM)	Includes a child's parent(s), teachers, and other individuals who can help determine what services a child needs to progress effectively in school.
Entitlement	An Entitlement is a legal right. The term is used in reference to Chapter 766, because eligible children and youth are entitled to services and supports written into an Individualized Education Program (IEP). Entitlement programs cannot restrict services to eligible individuals based on funding constraints.

Free Appropriate Public Education (FAPE)	The language used in the federal IDEA to define the right of children with disabilities to publicly funded special education and related services that meet state education standards. The term encompasses preschool, elementary school, and secondary education provided in accordance with an IEP in the least restrictive environment.
Guardianship	Guardianship is indicated when an individual with disabilities is age 18 or older, is unable to make daily personal or financial decisions and is at risk, and where the individual has assets over and above those benefits payable to a representative payee. Full guardianship covers matters pertaining to the person and his finances. Other forms of guardianship are more limited.
Individuals with Disabilities Education Act (IDEA)	The federal special education law. IDEA requires public schools to offer all eligible children with disabilities a free, appropriate, public education in the least restrictive environment appropriate to their individual needs, through age 21. There is state-to-state variation in eligibility for special education services, but in general, IDEA ensures a child who has a disability that interferes with learning the right to an evaluation to determine if services are needed. In 1997 IDEA was amended to include mandates that transition planning begin by the age of 14 years as part of the individualized education planning for all students in special education. By the age of 16, the IEP must include a statement of needed transition services. This statement focuses on the goals, objectives, activities and services related to transition for students with special health care needs and disabilities, and defines the responsibilities of different agencies and any interagency linkages needed for transition services.
Inclusion	The full integration of students with special needs into the regular education setting with typical students. Special education services may be provided in an inclusive setting through individualized adaptation of curricula or classroom activities.
Individualized Education Program (IEP)	A special education service plan for a student in a school program. It is developed by the child's IEP team, and is required for all students receiving special education services. The IEP outlines the student's educational goals, and the services and assistance to which the student is entitled in order to meet those goals. Starting at age 14, the IEP must address transition planning.
Job Accommodation	The modification of a job, job site or work process to make a particular job accessible to a person with disabilities.
Least Restrictive Environment (LRE)	LRE defines the program and placement that assures that a child is educated with children who do not need special education to the maximum extent appropriate, and that special classes or separate schooling are used only when s/he cannot be educated in regular classes even with extra supports and services.
Out Placement	Refers to day or residential placements in private schools that may be necessary for significantly or uniquely disabled children. Services are provided by private contractors to the local education authority, often in partnership with the State Board of Education and other state agencies.

Person Centered Planning	An approach to career or transition planning that focuses on the strengths and interests of the individual.
Personal Care Attendant (PCA)	May be an employee of a home health agency, or may be hired privately by a consumer or family. PCAs assist with activities such as dressing, homemaking duties, eating, bathing, moving from bed to chair, or using the bathroom.
Plan to Achieve Self-Support (PASS)	A type of SSI work incentive. It is designed to help people with disabilities achieve self-support. It allows someone receiving or applying for SSI benefits to put aside a portion of their earned income to accomplish a specific work-related goal, such as tuition for school, or business start-up. The income set aside is not taken into consideration when determining the amount of the individual's SSI benefit. This program is available in all states through Social Security Administration offices.
Post-secondary education	Refers to community college, university and college level programs for students after high school.
Rehabilitation Act of 1973 (Section 504) P.L. 93-112	Federal legislation that protects the civil rights of persons with disabilities in federally assisted or run programs, including health or social programs supported by federal dollars. The law defines a person as disabled if he or she has a mental or physical impairment which substantially limits one or more major life activities. This law attempts to prevent exclusion or restriction from educational programs of students with health impairments and entitles students to special accommodations such as modified assignments or testing situations. Section 504 covers a larger group of students with disabilities than do special education laws.
Related Services	The term used to describe transportation, developmental, corrective and supportive services that are required to assist a child with a disability.
Special Education	Specially designed instruction that meets the unique needs of a child who has been evaluated and found to be eligible. Special education is provided at no cost to parents or guardians.
Supplemental Security Disability Income (SSDI)	A monthly cash benefit to workers with disabilities and their families based on prior contribution to payroll.
Supplemental Security Income (SSI)	A federal program that provides a cash benefit to low income children and adults with disabilities. In Massachusetts, people who receive SSI are eligible for Medicaid.
Supported Employment	Support from an outside agency to an individual in a paid community employment site where the majority of workers do not have disabilities.
Team Meetings (educational)	Held to determine a child's IEP. The program is based on identifying goals, objectives and health care needs. Team members always include family members (or proxies) and school representatives, and may include health care and community service staff.

Transition Services

Defined in IDEA as a “coordinated set of activities for a student, designed within an outcome-oriented process, that promotes movement from school to post-school activities, including post-secondary education, vocational training, integrated employment (including supported employment), continuing and adult education, adult services, independent living, and community participation.” IDEA calls for these activities to be based on the individual student’s needs, preferences and interests, and to focus on academic instruction, related services, community experiences, the development of employment and other post-school adult living objectives, and development of daily living skills and functional vocational evaluation. (P.L. 101-476; § 300.27) More generally, transition services may be thought of as including activities in school, community or health care settings which help an adolescent and his or her family achieve greater autonomy and self-management.

Transition Team

Members may include but are not limited to the student, family members, education staff, state agency case managers, occupational therapists, physical therapists, vocational rehabilitation specialists, speech and language pathologists, social workers, college counselors, advocates and friends.

Vocational Assessment

A process to evaluate an individual’s strengths, interests and abilities. The process should include assessment of the work, social and cultural environment.

Vocational Rehabilitation Programs

Programs in every state that support people with disabilities, based on eligibility, to outline personal employment goals and become employed. State vocational rehabilitation programs can assign a vocational rehabilitation counselor to assist the individual with disabilities in the employment process.
