

State Intellectual and Developmental Disability Agencies' Service Trends

By Jean E. Winsor

In FY2012, an estimated 605,680 individuals received day or employment supports from state IDD program agencies. This number grew from 457,405 in FY1999. The estimated number of individuals in integrated employment services increased from 108,680 in FY1999 to 111,670 in FY2012. State investment continues to emphasize facility-based and non-work services, rather than integrated employment services. Figure 1 shows the trends in the percentage of people served in integrated employment and facility-based and non-work settings between FY2004 and FY2012.

Since Fiscal Year 1988, the Institute for Community Inclusion has administered the National Survey of State Intellectual and Developmental Disability Agencies' (IDD Agencies) Day and Employment Services. The work is funded by the Administration on Developmental Disabilities and is designed to describe the nature of day and employment services for individuals with intellectual and developmental disabilities.

Major findings include the following:

- National estimates suggest that there has been modest growth in the number of individuals in integrated employment since 1988.
- The estimated percentage of individuals participating in integrated employment services was 18.4% in FY2012.
- Growth in supported employment primarily occurred between the mid-1980s and mid-1990s, and there has been a decline in the number of people with IDD in integrated employment since 2001.
- Growth in community-based non-work services has continued for states that report offering this service.
- There is large variation across states in participation in integrated employment (Table 1).

Figure 1. Estimated IDD Agency Service Distribution by Year

*Percents displayed represent estimates for the number of people served in integrated employment nationally including all 50 states and Washington, DC.

Table 1. Participation in Day and Employment Services in FY2012

State	Total Served	Percent Integrated Employment	Percent Community-based Non-work	Percent Facility-based Work	Percent Facility-based Non-work
